neutralization of E-wave
absorption, rapid fatigue
recovery, efficiency and
concentration improvement.

High quality far-infrared radiation and thermo therapy are basic.

- Excellent function to break down the "lactic acid" that causes fatigue.
- Reduced stress and reduced physical fatigue
- The source of all diseases of modern people! Simultaneously solving chronic fatigue and stress
- Protecting sleep hormone "melatonin" by fully absorbing harmful E-waves and neutralizing them
- 99.9% UV protection prevents skin aging even during sleep
- Helps stabilize brain waves so that you can deep sleep well even in a short time
- Helps improve cardiopulmonary endurance by improving the function of the heart and lungs
- Positive effects on the body's autonomic nervous system, such as blood circulation, etc.
- Create a pleasant sleeping environment anytime, anywhere in the four seasons to help you sleep soundly.

The purpose of this study is to verify the effectiveness of the Marience product by examining the effects of the SAYTHA (necklace, bracelet, anklet) product on body fatigue and brain waves in daily life.

clinical study object

Aerobic-specific sports athletes with 10 experimental groups and 11 control groups.

Data collection

height, weight, body composition, blood pressure, EKG, motor load test (G.X.T), lactic acid (Lactate), and brain wave testing.

Conclusion

These results indicate that by wearing SAYTHA in Marience product daily, athletes improve the resilience of body and recovery effectively through reducing fatigue and managing physical stress.

요약 본 연구는 일상생활 시 착용하는 세이타(SAYTHA) 물질이 함유된 마리엔스(목걸이, 팔찌, 발찌) 제품이 일상 중 신체 피로 및 뇌파에 미치는 영향을 살펴봄으로써 마리엔스 제품의 효과성을 검증하는데 그 목적이 있다. 연구를 위한 대상자는 유산소 특성 종목 운동선수를 실험군 10명과 대조군 11명으로 분석하였다. 마리엔스 제품의 운동수행능력 효과 검증에 의한 자료 수집은 제품 착용 전후 연구대상자들의 신장, 체중, 체성분, 혈압, EKG, 운동 부하검사(G.X.T), 젖산(Lactate)검사, 뇌파검사를 실시하였다. 신체 피로 물질 지표인 혈중 젖산 농도의 변화 Lactate(Peak)는 대조군에서 사전에 비해 사후에 유의하게 증가하였으며($P<0.01$), 상호작용효과도 나타났다($P<0.05$). Lactate(Recovery) 대조군에서 사전에 비해 사후에 유의하게 증가하였으며($P<0.01$), 상호작용효과도 나타났다($P<0.01$). 또한, 뇌파 지표 좌우 전전 두엽(Fp1, Fp2) 영역에서는 처치군과 대조군에서 사전에 비해 사후에 유의하게 차이가 나타났다($P<0.05$). [결론] 일상 생활 시 착용하는 마리엔스(목걸이, 팔찌, 발찌) 제품은 일상생활 중 스트레스 감소 및 만 안과 신체의 피로물질들을 완화시키는 데 도움이 될 것으로 사료된다.

Abstract The purpose of this study is to verify the effectiveness of mariens products by examining the effects of mariens (necklaces, bracelets, anklets) products containing SAYTHA substances worn in everyday life on body fatigue and brain waves during daily life. The study subjects analyzed aerobic characteristics athletes of 10 experimental groups and 11 control groups. Data collection for verifying the effect of Marien's performance on exercise performance was conducted before and after wearing the product by subjects such as height, weight, body composition, exercise graded test (GXT), Lactate test, EEG test. Changes in Lactate(Peak), a change in blood lactate concentration, which is an indicator of physical fatigue, significantly increased after treatment ($P<0.01$) and interaction effect ($P<0.05$) in the control group. In the Lactate (Recovery) control group, there was a significant increase ($P<0.01$) and an interaction effect ($P<0.01$) compared to before. In addition, in the left and right frontal lobe (Fp1 and Fp2) regions of the EEG indicator, there was a significant difference in the treatment group and the control group compared to the prior group ($P<0.05$). [Conclusion] The Mariens (necklace, bracelet, anklet) product worn in everyday life is thought to play a role in reducing fatigue in the body as well as reducing stress during daily life.
